

## FIRMWARE ANNOUNCEMENT

June 2025

### SUBJECT

FW: 5.1.2.0.63703\_20250604 Solar/Cellular Camera

### Solar IPC v5.1.2

#### Supported Models

**SOL1-240ADSRN-36 & CEL1-240ADSRN-36**

#### LIST OF IMPROVEMENTS:

##### 1) IMPROVED: INCREASED CONCURRENT CONNECTIONS

The number of simultaneous connections has been doubled, enabling more devices and management platforms to connect simultaneously.

Streaming connections on the HTTP and Data ports now **support up to 6 concurrent streams** (up from 3), and Port 9008 supports **up to 10 simultaneous sessions** (up from 5), ensuring smoother, more reliable access.

##### 2) IMPROVED: EXPANDED APN SUPPORT

We've optimized the built-in APN lists to cover more cellular providers, enabling **automatic APN configuration** for a broader range of networks. This eliminates the need for manual APN setup, **simplifying deployment and reducing configuration time**.

##### 3) BUG FIXES & STABILITY IMPROVEMENTS

- **Connection times and stability** with the **Provision Cam2 Mobile app** have been optimized for a seamless user experience.
- The **time bar** jump issue **during playback** has been resolved, ensuring a smoother video review.
